Subject: Cape Cod Commission Interest in PFAS Session
Attachments: LSPA PFAS Workshop March 14 2017.pdf

Hi Alex/Deb

This is to let you know that I talked to Tom Cambareri (Cape Cod Commission) to check on his availability and interest in presenting at one of the PFAS sessions on June 26. I did not promise a role but explained that we are looking for possibilities.

After an explanation of the role, including the 10 minute constraint, Tom seemed very interested and promised to check in with his management, which he did and received an OK. Tom has been actively involved in many aspects of all of the PFAS investigations on the Cape, including Hyannis, Barnstable and MMR. He even mentioned the tanker truck accident. We believe that the best fit for him would be in the Identifying PFAS in my Community Session.

Just as context, I asked him to send me a power point presentation that he has already given which is attached. He appreciates that any presentation would have to be condensed and adjusted to the audience.

Told him I would take his information to my management and PFAS steering committee and would get back in touch with him.

I think he would be an interesting speaker, and would be happy to work with him on a presentation.

Let me know what you think.

BTW – asked if there are any citizen group that would be offended if not asked to speak about the Cape and he said “no”.

Enjoy the rest of day
Jane

Hi Jane,

I have received support and look forward to participating in the working session on June 26, 2018.

Attached is a pdf of my presentation to the LSP – Association about the Hyannis situation.

Please let me know any particulars.

Thank you for the opportunity.

-Tom

Hi Tom

This is the one meeting we are doing in New England – at least for now.

Have a good day

Jane

Subject: EPA announces first PFAS community engagement location

Good Morning!

Wanted to make sure that you saw the announcement for the PFAS community engagement meeting to be held in NH.

Yesterday, EPA announced the first PFAS community engagement location to be held June 25 and June 26 in Exeter NH (see below) .

**

Environmental Protection Agency (EPA) will kick off the Per- and Polyfluoroalkyl Substances (PFAS) community engagements with a two-day event in Exeter, New Hampshire. The goal of the event is to allow the EPA to hear directly from New England communities to understand ways the Agency can best support the work that is being done at the state, local, and tribal level. For more information on the event, visit the EPA's PFAS website:

<https://www.epa.gov/pfas/pfas-community-engagement>.

Details: The event will be held on June 25-26, 2018. On June 25, a listening session will be held at 4:30 p.m. to 10:00 p.m., eastern time. A working session will be held on June 26 from 8:00 a.m. to 3:00 p.m., eastern time. The two-day event will be held at the Exeter High School, 1 Blue Hawk Drive, Exeter, New Hampshire 03833. For more visit: <https://www.epa.gov/pfas/pfas-community-engagement-exeter-nh>

The full agenda is still in flux – likely to be finalized early next week

Let me know if any questions/concerns

Have a good day
Jane
